Commission économique et sociale pour l’Asie et le Pacifique

Soixante et onzième session
Bangkok, 25-29 mai 2015
Point 4 a) de l’ordre du jour provisoire**
Questions relatives à la gestion: projet de programme
de travail pour la période biennale 2016-2017

Projet de programme de travail
pour la période biennale 2016-2017

Note du secrétariat***

Résumé

Le projet de programme de travail de la CESAP pour la période 2016-2017 est soumis à la Commission pour examen.

En établissant le projet de programme de travail, tout a été fait pour refléter les priorités des États membres. Le programme de travail reflète également le dessein du secrétariat d’aider les États membres à faire de l’Asie et du Pacifique une région prospère qui repose sur le développement inclusif et durable, en gardant à l’esprit le programme de développement régional en gestation, les enseignements tirés de la mise en œuvre des précédents programmes de travail ainsi que les résultats d’une série d’évaluations. Il a pour but également de rendre la CESAP mieux « adaptée à l’objectif visé » en veillant au bon équilibre entre ses activités normatives, analytiques et opérationnelles et en maximisant ses avantages comparatifs, notamment l’adoption d’approches multisectorielles en mettant particulièrement l’accent sur les questions de nature régionale. Il établit des partenariats entre des organisations appartenant ou non au système des Nations Unies et des liens entre les sous-régions au sein même de la région Asie-Pacifique dans l’intérêt mutuel de l’ensemble des États membres.

Ce document comporte quatre sections: a) orientation générale du programme; b) cadres et stratégies de résultats des sous-programmes; c) produits proposés par sous-programme; et d) textes portant autorisation.

Les sections a), b) et d) proviennent du cadre stratégique pour la période 2016-2017, qui a été approuvé par la Commission à sa soixante-dixième session, en mai 2014, et par l’Assemblée générale dans sa résolution 69/17 relative à la planification des programmes. La section c) contient l’énoncé des produits proposés, qui sont conçus pour permettre à la CESAP d’obtenir les résultats planifiés, tels que
Le projet de programme de travail, y compris les produits proposés, se caractérise par une intégration équilibrée du développement durable dans les principaux domaines stratégiques, tels que définis par les États membres. Il entend promouvoir la coopération et l’intégration économiques régionales, en particulier grâce aux échanges et à la connectivité régionale dans les domaines des transports, de l’énergie et des technologies de l’information et de la communication sur le plan infrastructural, la réduction des inégalités sociales, notamment la réalisation des droits et l’autonomisation des femmes et le renforcement de l’inclusion sociale et des droits des groupes vulnérables et marginalisés, et la gestion durable des ressources naturelles, l’adaptation aux changements climatiques et l’atténuation de leurs effets, et la résilience face aux catastrophes et aux chocs. Il vise également à mettre en place des mécanismes institutionnels pour la coopération régionale dans un large éventail de domaines, dont le financement du développement durable, la science, la technologie et l’innovation et les capacités statistiques nationales, et à établir un cadre de responsabilisation au niveau régional pour les objectifs de développement durable.

À l’échelon sous-régional, le programme de la Commission sera mis en œuvre en veillant à assurer une corrélation plus étroite entre le programme de travail général de la CESAP et les priorités des États membres pour la sous-région et une meilleure coordination entre les divisions organiques, les bureaux sous-régionaux et les institutions régionales. Les bureaux sous-régionaux aideront les divisions organiques et les institutions régionales à exécuter les programmes régionaux concernant les pays qui sont de leur ressort, faciliteront le renforcement des relations stratégiques dans la sous-région, établiront des partenariats avec les principales parties intéressées et feront connaître les perspectives et analyses sous-régionales sur les grandes activités menées au titre du programme de travail général.

La Commission voudra peut-être donner au secrétariat ses directives sur le projet de programme de travail.
Programme 16: Economic and social development in Asia and the Pacific

Overall orientation

1. The mandate of the Economic and Social Commission for Asia and the Pacific (ESCAP), which is derived from Economic and Social Council resolutions 37 (IV) and 414 (XIII) by which the Commission was established, is to promote regional cooperation for inclusive and sustainable development in Asia and the Pacific. The role of the Commission was subsequently elaborated upon in various resolutions adopted by the General Assembly, the Economic and Social Council and the Commission itself.

2. This strategic framework covers the first biennium of the United Nations development agenda beyond 2015 (as and when approved by the General Assembly). Its strategic direction is derived from internationally agreed development mandates, including the outcome of the United Nations Conference on Sustainable Development, which emphasized the role of the regional commissions in promoting the balanced integration of the economic, social and environmental dimensions of sustainable development; General Assembly resolution 67/226 on the quadrennial comprehensive policy review, which called for the adoption of collaborative approaches to support country-level development initiatives; and Commission resolution 69/1 on a conference structure of the Commission for the inclusive and sustainable development of Asia and the Pacific.

3. Home to nearly two thirds of the world’s population, Asia and the Pacific is also the largest regional economy. Despite the lingering impact of the global financial crisis, Asia stands firm as the centre of the global economic recovery; serves as the hub of international trade, investment and technology transfer; and has succeeded in eliminating half of the world’s absolute poverty. Drawing on these foundations, the region stands at the cusp of its next large transformation as it rethinks and reinvests in itself, and rebalances economies towards greater reliance on domestic and regional
demand to sustain economic dynamism and close infrastructural and development gaps.

4. Despite such progress, most of the world’s poor and hungry still reside in the region. Poverty is not only prevalent in the least developed countries, but also in many middle-income countries. As benefits from economic growth continue to be distributed unevenly, increasing inequality between and within countries continues to pose a key challenge. With many workers remaining in vulnerable employment and millions of youths looking for jobs, creation of decent and productive jobs remains a priority. Economic insecurity is heightened by limited social protection coverage within much of the region. Eradication of poverty, balanced integration of the three pillars of sustainable development and promotion of inclusive economic and social policies to address these challenges will continue to be core priorities for ESCAP.

5. Economic growth coupled with changing patterns of production and consumption has increased the exploitation of natural resources and taken a severe toll on the region’s natural environment. The need to develop and implement sound green economy policies in the context of sustainable development and poverty eradication, including shared solutions across the region to ensure equitable access to sustainable water and energy resources, will continue to be crucial to the Commission’s regional cooperation efforts.

6. Asia and the Pacific continues to be the region most prone to disasters, including those events impacted by climate change. Increased economic integration has heightened the risk that a natural disaster in one country can have significant repercussions elsewhere. Adaptation to climate change and mitigation of its impacts in the context of inclusive and sustainable development will continue to be a priority, especially in the small island developing States of the Pacific, where the sustainable development of ocean resources provides a crucial basis for livelihoods.

7. Despite some progress towards attainment of gender equality in areas such as education, women across the region remain marginalized in public life; are less likely than men to own assets or participate in non-agricultural wage employment; tend to be heavily concentrated in the informal sector; and carry a disproportionate burden of unpaid domestic work. Gender-based violence remains a pervasive threat to the well-being of women and girls everywhere. Effectively addressing the many forms of gender inequality remains an essential component of advancing inclusive development.

8. Development efforts have been hampered by the lack of basic statistics about the social, economic and environmental circumstances in which people live. To address this, there is a need for effective, open and accountable institutions supported by administrative systems and processes, such as civil registration. Effective governance and accountability depend on a well-functioning and capable national statistical system that is able to produce and disseminate high quality official statistics. Statistical capacity-building will remain a key priority for the region’s cooperation efforts.

9. Given these opportunities, as well as persisting and emerging challenges, it is imperative that the region works together effectively to forge a development paradigm that builds on the achievements of the Millennium Development Goals; puts the balanced integration of the three pillars of sustainable development at the core; leaves no one behind; balances State and market roles to promote jobs and inclusive growth; and builds open and accountable institutions that are responsive to the emerging voices of non-
State actors. Critical to this agenda will be the development of new policy frameworks and regional instruments to generate more sustainable economic growth; strengthen regional economic integration; enhance connectivity in areas including infrastructure, information and communications technology, trade and transport; close development and equity gaps; improve governance; strengthen resilience to natural and economic shocks; and build on past achievements by lifting further hundreds of millions of people out of poverty and continuing to help countries with special needs to implement their respective programmes of action.

10. ESCAP provides the region’s most inclusive intergovernmental platform to facilitate the collective policy leadership and cooperation required to effectively seize these opportunities and address shared challenges. ESCAP will support member States by providing sound evidence-based strategic analysis, policy options and capacity development to implement innovative solutions for development that is inclusive, equitable, sustainable and resilient. In doing so, ESCAP will draw on the comparative advantages of its intergovernmental convening power; its regional norm-setting mandate and role; its multidisciplinary expertise and synergies across all divisions and offices; its role as a regional hub for sharing of development knowledge and lessons; network of subregional offices; and its ability to link subregions for mutual benefit.

11. The present strategic framework comprises eight mutually supportive and interconnected subprogrammes that reflect the priorities of member States. It builds on the achievements of the previous biennium and reflects the vital role of ESCAP in implementing the development pillar of the United Nations, while focusing on enhanced organizational effectiveness and attainment of measurable results.

12. During the biennium, efforts will be intensified to mainstream gender equality across all subprogrammes in line with commitments under the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women. The rights of persons with disabilities and vulnerable groups will likewise be a key driver across all aspects of programme implementation.

13. Effective partnerships, including with subregional organizations, other United Nations agencies, the business sector and civil society, will continue to be strengthened in order to ensure coherent approaches to addressing regional priorities. To this end, ESCAP will reinforce its role as the convener of the Asia-Pacific Regional Coordination Mechanism. In concert with the other regional commissions, ESCAP will also continue to promote interregional cooperation for inclusive and sustainable development and ensure that regional perspectives effectively influence global policy processes.

**Executive direction and management**

14. Executive direction and management is led by the Office of the Executive Secretary (hereinafter, the “Office”).

15. The Office provides overall policy direction to, and management of, the ESCAP secretariat in supporting member States, in collaboration with other parts of the United Nations system, with sound strategic analysis, policy options and capacity-building activities to address key development challenges and to implement innovative solutions for region-wide, equitable and inclusive economic prosperity, social progress and environmental
sustainability. Emerging issues relevant to the regional development agenda will be identified and addressed, and regional concerns and priorities will be articulated at the global level.

16. In this context, the Office provides all divisions, subregional offices and regional institutions with direction and guidance for coordinating the implementation of, and accountability for, the ESCAP programme of work, which will continue to focus on the promotion of inclusive, equitable and sustainable economic and social development, including through regional economic cooperation and integration, regional connectivity and the balanced integration of the three pillars of sustainable development in the context of the development agenda beyond 2015. The Office will also provide overall direction in mainstreaming gender equality and women’s empowerment policies and strategies across the programme of work in the context of supporting member States in promoting inclusive, equitable and sustainable development.

17. The Office has and will continue to strengthen policy consistency and coherence both within ESCAP and among United Nations entities and development partners involved in addressing regional development issues, among others, through the Regional Coordination Mechanism, which was established by the Economic and Social Council in its resolution 1998/46.

18. Furthermore, the Office provides overall direction and management with respect to the organization of annual Commission sessions as the most inclusive intergovernmental regional platform for building regional cooperation; the implementation of reforms of the ESCAP conference structure pursuant to Commission resolution 69/1; the strengthening of organizational effectiveness and results-based management; and the implementation of United Nations system-wide change management initiatives.

19. The Office will provide overall direction to programme support units in ensuring gender-responsive programme planning, financial and human resource management as well as accountability systems. Every effort will be made to advance towards the goal of equal representation of women and men in posts at all levels.

20. The Strategic Communications and Advocacy Section will promote the analytical, normative and capacity-building work of ESCAP through all forms of media, including social media, and promoting the visibility of the Commission as the most comprehensive platform for inclusive, equitable and sustainable development in the region.

No outputs have been linked to this expected accomplishment.

External factors

21. The Office of the Executive Secretary is expected to achieve its objectives and expected accomplishments on the assumption that: (a) governmental and non-governmental counterparts at the national level continue to commit and assign priority to regional collaboration on socioeconomic development issues; (b) entities within the United Nations system remain committed and attach adequate resources to enhancing system-wide policy coherence; and (c) the international community is
responsive to and supportive of the needs and concerns of ESCAP member States, in accordance with the guidelines established by the General Assembly and the Economic and Social Council, as well as the internationally agreed development goals.

Subprogramme I

Macroeconomic policy and inclusive development

Strategy

22. The substantive responsibility for the subprogramme is vested in the Macroeconomic Policy and Development Division, with support from the Centre for Alleviation of Poverty through Sustainable Agriculture. The strategic direction of this subprogramme is provided by the internationally agreed development goals, including those enunciated in (a) the outcome document of the United Nations Conference on Sustainable Development (General Assembly resolution 66/288, annex; (b) the outcome document of the High-level Plenary Meeting sixty-fifth session of the General Assembly on the Millennium Development Goals (see General Assembly resolution 65/1); (c) the follow-up to the outcome document of the Conference on the World Financial and Economic Crisis and Its Impact on Development (General Assembly resolution 63/303, annex); (d) the Doha Declaration on Financing for Development (General Assembly resolution 63/239, annex); (e) the programmes of action for the least developed countries, landlocked developing countries and small island developing States; and (f) other resolutions contained in the list of legislative mandates. It will be also guided by the post-2015 development agenda (as and when approved by the General Assembly).

23. Forward-looking macroeconomic policies are essential both to ensure economic stability and to support inclusive, equitable and sustainable development. With its emphasis on strengthening capacities to formulate and implement these policies for a resilient Asian and Pacific region, the subprogramme will monitor macroeconomic trends and prospects towards reducing poverty and narrowing development gaps; promote capacity development for the implementation of the post-2015 development agenda (as and when approved by the General Assembly); assist in the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States; promote development in fragile States by strengthening regional support measures; and strengthen regional and South-South cooperation in the form of policy dialogues and advocacy to address medium- to long-term challenges and to close development gaps. Special emphasis will be placed on efforts to strengthen regional economic cooperation and integration and on sharing good experiences and best practices. Due attention will be given to redressing gender inequalities; supporting the efforts of least developed countries to enhance their productive capacities to sustain their growth momentum and close their development gaps by 2020; and fostering a regional coordinated voice on development issues and challenges.

24. The Centre for Alleviation of Poverty through Sustainable Agriculture will provide a regional platform to promote research and capacity-building on sustainable agriculture and food security across member States. Efforts will be made to strengthen sustainable agriculture and food security in the region in order to reduce poverty in rural communities.
25. The subprogramme will be delivered in collaboration with the regional financial institutions, subregional organizations, regional and national centres of excellence, and national fiscal and monetary authorities.

External factors

26. The objective of the subprogramme and expected accomplishments will be achieved assuming that the global, regional and national environments remain conducive to (a) continued collaboration on strengthening regional economic integration; (b) promoting and supporting sustainable agriculture and food security; and (c) supporting the efforts of least developed countries to enhance their productive capacities and that adequate extrabudgetary resources are mobilized to ensure the necessary outreach and depth of technical cooperation activities.

Subprogramme 2

Trade and investment

Strategy

27. The substantive responsibility for the subprogramme is vested in the Trade and Investment Division, with support from the Asian and Pacific Centre for Transfer of Technology and the Centre for Sustainable Agricultural Mechanization. The strategic direction of the subprogramme is derived mainly from the internationally agreed development goals, including those enunciated in the outcome document of the United Nations Conference on Sustainable Development, the outcome document of the Follow-up International Conference on Financing for Development (General Assembly resolution 63/239, annex), the Almaty Programme of Action, as well as Commission resolutions 62/6 and 68/3.

28. To meet its objective, the subprogramme will be implemented through a combination of analytical and capacity-building work on trade, investment, enterprise development, sustainable agricultural mechanization, innovation and technology transfer, with a particular view to enhancing the contribution of trade and investment in meeting the development goals envisaged for the period beyond 2015 (as and when approved by the General Assembly). The focus of the analytical work will be to provide inputs for evidence-based policymaking and the sharing of experiences on related policy reforms.

29. The following issues will be addressed, with a key focus on inclusive, equitable, sustainable and resilient development and linkages with the post-2015 development agenda (as and when approved by the General Assembly): (a) strengthening the capacity of member States to effectively negotiate, conclude and implement trade and investment agreements at the international and regional levels, including the World Trade Organization Bali package and further agreements on the outstanding issues of the Doha Development Agenda; (b) designing and implementing trade facilitation policies and measures, including paperless trade systems; (c) formulating and implementing effective policy measures to strengthen responsible business practices and the integration of small and medium-sized enterprises, including agro-based enterprises, into regional and global value chains, with attention given to the different needs, challenges and interests of women and
men entrepreneurs; (d) promoting foreign direct investment; (e) promoting technological innovation and transfer; and (f) establishing and strengthening common frameworks and mechanisms for regional cooperation in trade, investment, technology transfer and the development of small and medium-sized enterprises, including agricultural enterprises.

30. With regard to regional cooperation, the subprogramme will continue to support further development of the Asia-Pacific Trade Agreement. Regional cooperation among research institutions and think tanks will continue to be fostered through the Asia Pacific Research and Training Network on Trade, which operates as a regional knowledge platform for trade and investment reform. The Asia-Pacific Network for the Testing of Agricultural Machinery will play an important role in promoting and facilitating trade of sustainable and safe agricultural machinery. The Asia-Pacific Business Forum and the ESCAP Business Advisory Council, including its Sustainable Business Network, will engage representatives of the private sector in exploring the establishment of public-private partnerships to pursue inclusive and sustainable development. The United Nations Network of Experts for Paperless Trade in Asia and the Pacific will provide the regional community with the knowledge needed to achieve concrete progress in trade facilitation and paperless trade. Mechanisms such as the Renewable Energy Cooperation-Network for the Asia-Pacific and the Regional Network for Strengthening Research and Development Management Capacity in New and Emerging Areas of Technology, will be further developed as important mechanisms for regional cooperation on technology transfer. In recognition of the differential impacts of trade and investment for women and men, gender will be mainstreamed in the work and outputs of the aforementioned entities.

### Categories of outputs and final outputs

(a) Technical cooperation (regular budget/extrabudgetary)

(i) Field projects

- Increased capacity of member States to develop and implement appropriate trade and investment policies, including the Asia-Pacific Trade Agreement and other trade and investment related agreements and Aid for Trade programmes (2016-2017)
- Increased capacity of member States to develop and implement trade facilitation measures, including for paperless trading, to remove regulatory and procedural barriers to trade (2016-2017)
- Increased capacity of member States to strengthen key components of national and subsectoral innovation systems and improve the capacity of member countries to implement evidence-based science, technology and innovation policy (2016-2017)
- Increased capacity of member States to strengthen technology transfer and the development of technologies for sustainable development, focusing on renewable energy and nanotechnology (2016-2017)
- Increased capacity of member States to formulate and implement policies and strategies to promote sustainable agricultural mechanization, including through development of the Asian and Pacific Network for Testing of Agricultural Machinery (2016-2017)
External factors

31. The objective of the subprogramme and expected accomplishments will be achieved assuming that: (a) the global, regional and national environments remain conducive to continued collaboration on trade, investment and other financial issues; (b) national institutions are willing to provide relevant information; and (c) adequate extrabudgetary resources are mobilized to ensure the necessary outreach and depth of technical cooperation activities.

Subprogramme 3

Transport

Strategy

32. The substantive responsibility for this subprogramme is vested in the Transport Division. The strategic direction of the subprogramme is derived from phase II (2012-2016) of the Regional Action Programme for Transport Development in Asia and the Pacific, from the relevant resolutions contained in the list of legislative mandates and from the outcome of meetings of ministers of transport convened by ESCAP. It will also be guided by the post-2015 development agenda (as and when approved by the General Assembly). During the biennium, the subprogramme will support member States in working towards the vision of an international, integrated, intermodal transport and logistics system connecting the Asian and Pacific region. It will do this by supporting member States in their efforts to integrate the regional transport networks, including by continuing to act as the secretariat for the intergovernmental agreements governing the Asian Highway network, Trans-Asian Railway network and dry ports. In particular, the subprogramme will support the least developed countries, landlocked developing countries and small island developing States in their efforts to develop and upgrade their transport networks, including through public-private partnerships and private-sector involvement in infrastructure projects. In line with the Regional Action Programme, the secretariat will also continue to focus on improving inter-island shipping in archipelagic and island countries. Special consideration will be given to mainstreaming gender considerations into the subprogramme.

33. To enhance the operational efficiency of regional transport networks, the subprogramme will assist member States’ efforts to identify and implement measures to address non-physical bottlenecks, conduct training to improve the performance of logistics industry and related transport services and promote improved connectivity between subregions. The subprogramme will also assist member States in designing and implementing transport policies that support inclusive, equitable, sustainable and resilient development. These include modal shifts from roads to railways and other more fuel-efficient means; greater use of public transport, particularly in urban areas; improvement of road safety; and policies to improve access to transport for all members of society. Such policies will also be responsive to the different needs and interests of women and men, and strengthen rural transport planning and rural-urban linkages.

34. The Transport Division will strengthen cooperation with other international, regional and subregional organizations as well as other regional commissions and transport associations that are active in the development of the region’s transport systems.

b. Strengthening the capacity of policymakers and the private sector to develop efficient freight forwarding, multimodal transport and logistics services (2016-2017)

External factors

35. The subprogramme is expected to achieve its objectives and accomplishments on the assumption that: (a) Governments of members and associate members are willing to collaborate and are able to implement the proposed programmes and projects within the period; and (b) adequate extrabudgetary resources will be mobilized to ensure the necessary outreach and depth of technical cooperation activities.

Subprogramme 4

Environment and development

Strategy

36. The substantive responsibility for the subprogramme is vested in the Environment and Development Division. The strategic direction of the subprogramme is mainly derived from the internationally agreed development goals, the outcomes of the United Nations Conference on Sustainable Development and relevant regional agreements within the context of ESCAP, and will be also guided by the post-2015 development agenda (as and when approved by the General Assembly).

37. The subprogramme will build on the previous achievements of the ESCAP secretariat in supporting countries of the region in their efforts to integrate the three dimensions of sustainable development. It will facilitate regional cooperation as an overarching strategy to address rapid urbanization, shortcomings in access to basic services, integrated water resources management and energy security as well as climate change, sustainable management of resources and other environmental pressures and constraints. The subprogramme will focus on supporting a long-term perspective in policymaking to sustain the quantity and improve the quality of growth based on enhanced economic dynamism, social inclusiveness, environmental sustainability and resilience, critical factors for achieving sustainable development.

38. The subprogramme’s expected accomplishments are complementary in nature and represent different stages in a process of engagement between the ESCAP secretariat and member States and major stakeholders: enhanced understanding leads to improved capacity, which in turn promotes enhanced regional cooperation frameworks and networks.
39. The subprogramme will continue to facilitate regional dialogues on sustainable development, which, inter alia, will identify regional priorities and perspectives and review progress in implementation in the region. The subprogramme will promote stakeholder involvement, multidisciplinary dialogue, multisectoral approaches and interministerial coordination through strengthened frameworks for regional and interregional cooperation and networking. It will work to foster policy and other innovation on the basis of sound research and analysis and the dissemination of knowledge, policy options and good practices, taking into account gender-specific considerations and paying specific attention to countries with special needs. The efforts will be further augmented by the provision of capacity-development support to member States.

40. To achieve the above, ESCAP will collaborate with other United Nations agencies, funds and programmes, including through the Asia-Pacific Regional Coordination Mechanism, intergovernmental organizations, public-private partnerships, community-based organizations, research institutes and other civil society organizations.

      a. Expert group meeting on means of implementation of internationally agreed development goals for Asian and Pacific cities (2016)
      b. Expert group meeting to support the development of the Asian and Pacific Energy Forum mechanism, including the regional trends report on energy for sustainable development, energy connectivity and the energy data and policy portal
      c. Expert group meeting on regional implementation of the outcomes of the United Nations Conference on Housing and Sustainable Urban Development (2017)
   (v) Assistance to representatives, rapporteurs

(b) Other substantive activities (regular budget/extrabudgetary)
   (i) Substantive servicing of inter-agency meetings
      b. Regional inter-agency consultative meetings on good urban governance (2016, 2017)
Categories of outputs and final outputs

(ii) Training courses, seminars and workshops

a. Policy dialogue on energy for sustainable development in Asia and the Pacific (2016)

b. Regional consultation meeting for the preparation of the second Asian and Pacific Energy Forum (2017)

(iii) Field projects

b. Enhancing regional cooperation on sustainable, inclusive and resilient cities in Asia and the Pacific (2016-2017)

External factors

41. The subprogramme is expected to achieve its objectives and expected accomplishments on the assumption that: (a) the development agenda beyond 2015 and the sustainable development goals are successfully adopted by the end of 2015; (b) economic, social and environmental conditions and trends continue to be conducive to the implementation of sustainable development strategies, including the green economy in the context of sustainable development and poverty eradication approach; (c) national economic, social and political conditions in the target countries remain stable; (d) government institutions and civil society organizations have the necessary human and financial capabilities to ensure successful cooperation; and (e) adequate extrabudgetary resources are mobilized to ensure the necessary outreach and depth of technical cooperation activities.

Subprogramme 5

Information and communications technology and disaster risk reduction and management

Strategy

42. The substantive responsibility for the subprogramme is vested in the Information and Communications Technology and Disaster Risk Reduction Division, with support from the Asian and Pacific Training Centre for Information and Communication Technology for Development. The subprogramme deals with pressing contemporary development challenges of building resilience to natural disasters and deepening connectivity in Asia and the Pacific, with the strategic direction provided by the resolutions contained in the list of legislative mandates and the post-2015 development agenda (as and when approved by the General Assembly). The subprogramme will be implemented through a combination of normative, analytical and capacity-building work and will be anchored in regional cooperation mechanisms.

43. The subprogramme will continue to promote regional cooperation in information and communications technology connectivity for the creation of an inclusive, knowledge-based society that is resilient to multiple, complex and interrelated threats posed by disasters. In this context, the subprogramme will provide member States with analysis on critical information and communications technology infrastructure, including cross-sectoral synergies
for electronic resilience, especially in countries with special needs. The subprogramme will also provide policy analysis, options and recommendations for promoting innovation, digital inclusion and a seamless regional information space that deepens regional connectivity. These efforts will be further augmented by information and communications technology capacity-building activities conducted by the Asian and Pacific Training Centre for Information and Communication Technology for Development and partners utilizing the Centre’s programmes.

44. The subprogramme will assist member States in deepening and broadening the applications of space technology and geographical information systems for managing disaster risks and achieving sustainable development, especially in high risk and low-capacity developing countries. It will continue to provide near real-time satellite data and imagery and other products and services during disasters, pool expertise and resources at the regional and subregional levels, facilitate sharing of good practices and create synergy with other existing regional initiatives. The subprogramme will be delivered through regional cooperation mechanisms, including the Regional Space Applications Programme for Sustainable Development and the Regional Cooperative Mechanism for Drought Monitoring and Early Warning, and through the implementation of the Asia-Pacific Plan of Action for Applications of Space Technology and the Geographic Information System for Disaster Risk Reduction and Sustainable Development, 2012-2017.

45. The emphasis of the disaster risk reduction and management work will be on enhancing regional knowledge and knowledge-sharing, development of disaster information and strengthening of capacities to manage risks and vulnerabilities in order to reduce socioeconomic impacts of disasters and build resilience. The subprogramme will provide member States with analysis, strategies and evidence-based policy options in mainstreaming disaster risk reduction, including climate change adaptation, into long-term development plans and strategies. The efforts will be further augmented by the regional advisory services on disaster risk reduction, the progress towards an integrated regional early warning system provided through the ESCAP Multi-Donor Trust Fund for Tsunami, Disaster and Climate Preparedness in Indian Ocean and Southeast Asian Countries, and capacity-building activities delivered through ESCAP-supported regional mechanisms.

46. The subprogramme will also seek collaboration with other United Nations entities, United Nations-supported mechanisms such as the Centre for Space Science and Technology Education in Asia and the Pacific and relevant regional and subregional organizations to achieve synergy and maximize impact in the region.

Table 6
Objectives for the biennium, expected accomplishments, indicators of achievement and performance measures

**Objective of the Organization:** To enhance the contribution of information and communications technology connectivity, space applications, and disaster risk reduction and management strategies to the achievement of inclusive, sustainable and resilient development in Asia and the Pacific

Categories of outputs and final outputs

(a) Servicing of intergovernmental and expert bodies (regular budget/extrabudgetary)

(i) Economic and Social Commission for Asia and the Pacific (ESCAP)

a. Parliamentary documentation

   i. Reports on issues related to information and communications technology and disaster risk reduction and management (2016, 2017)

(ii) ESCAP Committee on Information and Communications Technology

   a. Substantive servicing of meetings: plenary (3 days in 2016)

   b. Parliamentary documentation

      i. Report of the Committee on Information and Communications Technology (2016)

      ii. Reports on major issues related to information and communications technology (2016)

(iii) Ad hoc expert groups

   a. Expert group meeting on regional cooperative mechanisms in space applications for sustainable development (2016)

   b. Expert group consultation on principles and norms for the Asia-Pacific Information Superhighway (2016)

(iv) Assistance to representatives, rapporteurs

(b) Other substantive activities (regular budget/extrabudgetary)

(i) Booklets, fact sheets, wall charts, information kits

   a. Information materials on information and communications technology (ICT) and disaster risk reduction in the ESCAP region, including the Asia-Pacific Gateway for Disaster Risk Management and Development (2016)
Categories of outputs and final outputs

(ii) Technical material

a. Analytical review of emerging trends in ICT developments as contained in internationally agreed development goals and related global mandates (2016)

b. Study on the development of the Asia Pacific Information Superhighway, including a master plan covering policy and technical aspects (2016)

c. Technical and policy brief on ICT for regional integration, including trade, transport and disaster preparedness (2017)

(iii) Substantive servicing of inter-agency meetings

b. ESCAP/World Meteorological Organization Typhoon Committee (2016, 2017)

d. Intergovernmental Consultative Committee on Regional Space Applications Programme for Sustainable Development (2016, 2017)

e. Meeting of the post-World Summit on Information Society process (2016)

(c) Technical cooperation (regular budget/extrabudgetary)

(i) Training courses, seminars and workshops

a. Knowledge-sharing forum on disaster risk management and climate change adaptation to reduce transboundary disaster risk through South-South cooperation (2016)

b. Seminar on ICT connectivity integration, infrastructure collocation and Internet exchange points (2016)

(ii) Field projects

a. Project portfolio in early warning for coastal and climate-related disasters under the ESCAP Multi-Donor Trust Fund for Tsunami, Disaster and Climate Preparedness in Indian Ocean and Southeast Asian Countries (2016-2017)

c. Enhancement of regional ICT connectivity to promote e-resilience and access to broadband (2016-2017)

### Categories of outputs and final outputs

(a) Servicing of intergovernmental and expert bodies (regular budget)

(i) Economic and Social Commission for Asia and the Pacific (ESCAP)
   a. Parliamentary documentation

(ii) Assistance to representatives, rapporteurs

(iii) Booklets, fact sheets, wall charts, information kits

(iv) Technical materials
   a. ICT for development training modules for government leaders and other beneficiary groups (2016-2017)
   b. ICT for development case study series (2016-2017)
   c. ICT for development knowledge-sharing series (2016-2017)
   d. ICT for development trends brief (2016-2017)
Categories of outputs and final outputs

e. E-collaborative hub: updating of site for online convergence to
strengthen capacities in the use of ICT for development

f. Updating of the Virtual Academy the Asian and Pacific Training
Centre for Information and Communication Technology for
Development (http://ava.unapcict.org) (regular
budget/extrabudgetary)

(b) Technical cooperation (regular budget/extrabudgetary)

(i) Training courses, seminars and workshops

a. Workshop on ICT for development capacity-building for other
beneficiary groups (30 participants) (2016, 2017)

b. Capacity-building workshops of the Academy of ICT Essentials
for Government Leaders Programme of the Asian and Pacific
Training Centre for Information and Communication Technology
for Development (75 participants each) (3 in 2016, 3 in 2017)

c. Workshop on promoting ICT for development education for
students and youth (30 participants) (2016)

d. Partners meeting of the Asian and Pacific Training Centre for
Information and Communication Technology for Development
(20 participants) (2016, 2017)

(ii) Field projects

External factors

47. The subprogramme is expected to achieve its objectives and expected
accomplishments on the assumption that: (a) member States are willing to
collaborate in the areas of ICT, space and GIS applications and in disaster
risk reduction; and (b) adequate extrabudgetary resources are mobilized to
ensure the necessary outreach and depth of technical cooperation activities.

Subprogramme 6
Social development

Strategy

48. The substantive responsibility for the subprogramme is vested in the
Social Development Division. The strategic direction of the subprogramme is
derived mainly from the commitments agreed upon through relevant United
Nations intergovernmental processes, including: (a) the World Summit for
Social Development; (b) the Programme of Action of the International
Conference on Population and Development; (c) the Beijing Declaration and
Platform for Action; (d) the Convention on the Elimination of All Forms of
Discrimination against Women; (e) the Convention on the Rights of Persons
with Disabilities; (f) the International Convention on the Protection of the
Rights of All Migrant Workers and Members of Their Families; (g) the
Madrid International Plan of Action on Ageing, 2002; (h) the World
Programme of Action on Youth; (i) the United Nations Millennium
Declaration (see General Assembly resolution 55/2) and the commitments
adopted by the General Assembly in the outcome document, “Keeping the
promise: united to achieve the Millennium Development Goals”
(resolution 65/1); and (j) the Political Declaration on HIV and AIDS: Intensifying our Efforts to Eliminate HIV and AIDS (General Assembly resolution 65/277, annex); it will also be guided by the post-2015 development agenda (as and when approved by the General Assembly). Regional mandates that guide the subprogramme include the Incheon Strategy, the Bangkok Statement on the Asia-Pacific Review of the Implementation of the Madrid International Plan of Action on Ageing, the Bangkok Declaration on Beijing+15, the outcome document of the Asia-Pacific High-level Intergovernmental Meeting on the Assessment of Progress against Commitments in the Political Declaration on HIV/AIDS and the Millennium Development Goals and the Asian and Pacific Ministerial Declaration on Population and Development of the Sixth Asian and Pacific Population Conference which was adopted by a vote.

49. The subprogramme will aim to promote change at the policy and institutional levels. The main target group of the subprogramme will be government officials and institutions, particularly those involved in the formulation, implementation and management of social development policies and programmes. The strategy will focus on the conduct of applied research, analysis and the dissemination of knowledge products on social policy options, strategies and programmes as a basis for evidence-based decision-making by Governments. Good practices on social protection systems, including those that are gender-responsive and address the needs of vulnerable groups in society, will be analysed and documented for the purpose of adaptation and wider replication in the region. The Commission’s convening role, particularly with regard to promoting regional cooperation and consensus building on accelerating the implementation of international commitments on population and development, gender equality and social integration of vulnerable groups, will be emphasized. Technical assistance to developing countries, including those in special situations, will be intensified to build national capacity, including through sharing of policy options, good experiences and good practices in the context of the transfer of knowledge and skills on a range of social development issues and through South-South cooperation. The subprogramme will adopt a multipronged strategy that incorporates cross-cutting issues, including gender responsiveness and a rights-based approach, into policies and programmes. Partnerships will be further strengthened with a range of stakeholders, including civil society organizations and research institutes. The subprogramme will coordinate closely with United Nations agencies, funds and programmes and other international organizations to achieve synergy and maximize impact in the region.

Table 7
Objectives for the biennium, expected accomplishments, indicators of achievement and performance measures

Objective of the Organization: To strengthen regional cooperation in building a socially inclusive society that protects, empowers and ensures equality for all social groups in Asia and the Pacific

(iv) Special events

(v) Technical material

(c) Technical cooperation (regular budget/extrabudgetary)
(i) Field projects
   a. Field project on promoting the rights of persons with disabilities through the implementation of the Incheon Strategy and the Convention on the Rights of Persons with Disabilities (2016-2017)
   b. Field project on enhancing the collection of reliable and comparable data on disability to report on the Incheon Strategy indicators (2016-2017)

External factors

50. The subprogramme is expected to achieve its objectives and expected accomplishments on the assumption that: (a) relevant stakeholders at the national level are prepared to provide the data and information necessary for the secretariat to conduct its analytical work; (b) national institutions are willing to pursue regional cooperation in a range of social development areas; and (c) adequate extrabudgetary resources are mobilized to add value to the secretariat’s normative and analytical work and extend its outreach and services to countries in the ESCAP region.

Subprogramme 7
Statistic
Strategy

51. The substantive responsibility for the subprogramme is vested in the Statistics Division, with support from the Statistical Institute for Asia and the Pacific. The subprogramme is guided by the Committee on Statistics, the relevant subsidiary body of the Commission that forms the basis for regional consensus-building for action and represents an effective mechanism for contributing to global mandates. The subprogramme derives its mandate from the two overarching strategic goals of the Committee on Statistics, namely, (a) ensuring that all countries in the region by 2020 have the capability to provide an agreed basic range of population, economic, social and environment statistics, and (b) creating a more adaptive and cost-effective information management environment for national statistical offices through stronger collaboration.

52. The subprogramme will aim to improve the availability, quality and use of statistics in support of good governance for equitable, sustainable,
inclusive and resilient societies in Asia and the Pacific. The strategy will focus on using core sets of statistics to focus national efforts, coordinate regional cooperation and mobilize support by all relevant development partners for national statistical capacity strengthening. Coordinated regional and in-country training, including the regular programme of training of the Statistical Institute for Asia and the Pacific, is a main pillar of regional initiatives of statistical capacity strengthening. More broadly, the subprogramme will continue to work closely with the Partners for Statistics Development in Asia-Pacific, a grouping of international, regional and bilateral organizations, to improve the combined impact of capacity-building activities through enhanced coordination, synergy and complementarity among partners.

53. Within the overall programme of work, the subprogramme will also link its work closely with that of other subprogrammes to support evidence-based policy analyses and advocacy. Capitalizing on the diversity in the region, the subprogramme will emphasize sharing of knowledge, experiences and solutions in developing and implementing regional initiatives to strengthen national statistical capacity. The subprogramme will make full use of the opportunities arising from the increased capacities of member States as centres of expertise and providers of development assistance, including through South-South cooperation modalities. The subprogramme will make conscious efforts to adapt its approaches to specific country circumstances and needs of member States. For least developed member States with more acute and widespread needs, this often means targeted support.

54. The subprogramme will also seek collaboration with subregional institutions for effective implementation of regional initiatives and improved statistical integration.

### Table 8

### Categories of outputs and final outputs

(a) Servicing of intergovernmental and expert bodies (regular budget/extrabudgetary)

(i) Economic and Social Commission for Asia and the Pacific (ESCAP)

   a. Parliamentary documentation

   i. Reports on issues related to the Statistical Institute for Asia and the Pacific (2016, 2017)

(ii) Ad hoc expert groups

(iii) Assistance to representatives, rapporteurs

(b) Other substantive activities (regular budget/extrabudgetary)

(i) Technical material

   a. Web-based knowledge-sharing facilities, including e-learning instructional design and management systems, related to targeted training courses, seminars and workshops developed by the Statistical Institute for Asia and the Pacific (2016, 2017)

(ii) Substantive servicing of inter-agency meetings

Categories of outputs and final outputs

b. Substantive servicing of the Network for the Coordination of Statistical Training in Asia and the Pacific: meetings and activities of the Network and of its subgroup/working groups (2016-2017)

(c) Technical cooperation (regular budget/extrabudgetary)

(i) Field projects

a. Strengthening national statistical systems through institutional reform and modernization of their statistical systems to fully meet client needs (2016-2017)

b. Strengthened capacity of national statistical systems to produce and disseminate economic, environmental, disaster, gender, disability, population and social statistics (2016-2017)

c. Strengthened capacity of national civil registration and vital statistics systems to implement the Regional Action Framework on Civil Registration and Vital Statistics in Asia and the Pacific (2016-2017)

d. Improved knowledge and skills of government officials and statisticians, especially countries with special needs, to produce, process, analyse and manage quality data and statistics in support of measuring progress towards sustainable and inclusive development goals through training courses on statistical frameworks, standards and basic methodologies (2016-2017)

e. Improved knowledge and skills of government officials and statisticians to improve the availability and quality of economic statistics and system of national accounts, agricultural statistics, vital statistics, social statistics, gender statistics, and environment statistics and environmental accounting and to apply new measurement procedures and use new data sources through regional, subregional and country training (2016-2017)

g. Strengthened capacity of national statistical systems to provide statistical training through improved coordination and enhanced partnerships for increased innovations and collaboration and training-of-trainers courses (2016-2017)

External factors

55. The subprogramme is expected to achieve its objectives and expected accomplishments on the assumption that: (a) relevant stakeholders at the national and international levels continue to accord the necessary priority to statistics development; (b) national institutions are willing to pursue regional cooperation in a range of statistics development areas; and (c) adequate extrabudgetary resources are mobilized to ensure the necessary outreach and depth of technical cooperation activities and other services.
Subprogramme 8
Subregional activities for development

Strategy

56. The overall responsibility for coordinating the work of the subprogramme is vested in the Office of the Executive Secretary. The subprogramme will be implemented by the subregional offices in the Pacific, East and North-East Asia, North and Central Asia and South and South-West Asia, and by ESCAP headquarters in the South-East Asian subregion. Internationally agreed development goals, including the post-2015 development agenda (as and when approved by the General Assembly), the outcome of the United Nations Conference on Sustainable Development and the programmes of action for the least developed countries, landlocked developing countries and small island developing States provide the mandates and strategic direction for the subprogramme.

57. Given the vast coverage and diversity of the Asian and Pacific region, the subprogramme would strengthen the Commission’s presence and strategic position at the subregional level, enabling better targeting and delivery of programmes that address specific key priorities of member States in the five subregions. Priority will be accorded to strengthening sustainable, equitable and inclusive development and supporting the integration of the least developed countries, landlocked developing countries and small island developing States for a resilient Asian and Pacific region.

58. Each component of the subprogramme reflects the specific needs of the relevant subregion within the context of existing subregional cooperation frameworks and the institutional landscape. The subprogramme leverages the analytical and normative work of the Commission and supports capacity development through technical cooperation, including South-South cooperation among ESCAP member States, and the provision, on request, of advisory services. Emphasis will be placed on knowledge sharing and networking, including the dissemination of good practices for adaptation, experience sharing and replication. The subprogramme will collect data and produce subregional analysis on identified priority areas in order to ensure greater depth and coverage in its analytical work.

59. In line with the quadrennial comprehensive policy review of operational activities for development of the United Nations system, cooperation and coordination with the funds, programmes, specialized agencies and other entities of the United Nations development system will be strengthened at the regional level in order to support country-level development initiatives, at the request of recipient countries, in alignment with the United Nations Development Assistance Framework. The subregional offices will also work closely with subregional organizations, non-governmental organizations, the private sector and other stakeholders in their respective subregions.

60. The subregional office for the Pacific will work closely with the Council of Regional Organizations of the Pacific, and in particular the Pacific Islands Forum Secretariat, the Secretariat of the Pacific Community and the Secretariat of the Pacific Regional Environment Programme through the Sustainable Development Working Group, to assist member States in the following priority areas:

(a) National sustainable development planning to address sustainable development in the Pacific;
(b) Balanced integration of the economic, social and environmental dimensions of sustainable development;

(c) Climate change, environmental degradation and management of the ocean;

(d) Gender inequality.

61. The subregional office for East and North-East Asia will work closely with major development partners in the subregion, including the Greater Tumen Initiative, to assist member States in the following priority areas:

(a) Promoting subregional cooperation on green economy (in the context of sustainable development and poverty eradication) and subregional environmental challenges such as nature and marine conservation and transboundary air pollution, including through the North-East Asian Subregional Programme for Environmental Cooperation;

(b) Facilitating subregional cooperation towards inclusive development while ensuring gender equality, in particular by leveraging the skills and knowledge of older persons, women, youth and persons with disabilities;

(c) Enhancing transport and trade facilitation to promote economic growth and cooperation in East and North-East Asia;

(d) Strengthening disaster resiliency in East and North-East Asia through enhanced cooperation on technology and knowledge-sharing.

62. The subregional office for North and Central Asia will work closely with the Economic Commission for Europe, as well as the Economic Cooperation Organization, the Eurasian Economic Commission and Eurasian Development Bank, the International Fund for Saving the Aral Sea and the Shanghai Cooperation Organization to assist member States in the following priority areas:

(a) Subregional cooperation in transport, water and energy, trade, statistics, knowledge-based development and gender and economy through the United Nations Special Programme for the Economies of Central Asia;

(b) Transport and trade facilitation through improved transport links, transit transport and trade facilitation measures, and reduction of trade barriers;

(c) Energy and water resource management, environmental protection, disaster risk reduction and climate change adaptation.

63. The subregional office for South and South-West Asia will work closely with the South Asian Association for Regional Cooperation, the Economic Cooperation Organization and the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation, international organizations, government agencies and civil society think tanks, among other stakeholders, to assist member States in the following priority areas:

(a) Accelerating inclusive and sustainable growth, poverty eradication, gender equality and universal access to quality education and health, in line with the development agenda beyond 2015 (as and when approved by the General Assembly);

(b) Subregional connectivity through transport, trade and transport facilitation and infrastructure investment for economic integration;
(c) Attainment of sustainable development goals on energy and food security through subregional cooperation;

(d) Subregional cooperation for increased capacity for disaster risk reduction strategies and policies;

(e) Assisting the least developed and landlocked countries of the subregion in accelerating inclusive development through increased productive capacity and achieving graduation from least developed country status.

64. ESCAP will work closely with the Association of Southeast Asian Nations to assist the integration of the least developed countries into the South-East Asia subregion.

65. ESCAP will build strategic partnerships with other key intergovernmental institutions and development actors in the subregions, and develop and implement programmes in a coherent and coordinated manner, utilizing the United Nations development system at the subregional and national levels to bridge key development gaps.
